Chapter 1

A dark figure in a dark room looks at computer screens that display footage of cities around the world. The figure looks at all the screens. The figure said, “There still is no sign of him. Beta!” A female robot enters the room. She said, “Yes, master?” The figure said, “I have been searching for years now and I still have not found him. My robot police force that treks the world has not reported him as being killed or captured yet.” Beta said, “What do you want me to do?” The dark figure said, “I will have to look for him myself. I will plant even more police and military on every street in the world. I will do that until I find the only thing that has ever threatened me.” The figure clutches a picture of the robot called Justin in his hand and he crushes it.

Orlando Florida 2110

A girl sits at a bench in a school park while she looks over a book she is supposed to study. A football hits her in the face and she said, “Ouch! Watch it!” The girl that threw the football said, “Then don't stand in its way, moron! Why do you have to be such an idiot?” The girl on the bench said, “Why do you have to be such an idiot?” The football girl said, “I've had it.” The football girl beats the girl up on the bench and the football girl said, “I will keep beating you up until you admit you're a slow in the mind.” The girl on the bench said, “I will not admit that because it's not true.” The football girl said, “Tracy, you're a hypocrite.” Tracy said, “I've had enough with you, Alga.” Alga said, “I will make this harder.” People crowd around and they cheer Alga as she beats up Tracy. Tracy is left on the ground all dirty and beat up. Alga takes some of the dirt off Tracy and she puts it on herself and she rubs some dirt on her and she rolls around in the mud. The principal walks to the scene and she said, “What's going on here?” Alga said, “Tracy beat the crap out of me.” The principal said, “Don't worry my brave little girl. You will be alright. I will take you out for a treat after I punish the young fool that did this to you.”

Tracy is in the principal's office and the principal yells at her. The principal said, “I've had enough with you. I know you just moved here but that doesn't give you the right to beat on my daughter.” Tracy said, “I didn't beat her up. I swear.” The principal said, “You just don't get it. Do you know anyone that is an idiot?” Tracy said, “Not that I know of.” The principal said, “You are an idiot and it causes you do to all these things. You are not getting far in life. I am putting you back in kindergarten for the next academic year so you can learn to be better to my daughter. Now get your dirty filth out of my office.” Tracy walks out of the school and she walks down the street crying.

She walks down the street and she comes across Alga and her friends again. Alga said, “You're going to lose today.” Tracy looks at her watch and she presses a button on it

and a skateboard comes out of her backpack and she takes off on it. She glides down the street on it. Alga and her friends also have these skateboards and they chase after her. Tracy makes some sharp turns and some quick moves. She runs into Chinatown. Alga and her gang follow her. Tracy looks behind her and she sees Alga sneaking up on her. Tracy sees her skateboard is running out of power. It dies and Tracy stops in front of a Chinese restaurant. Tracy shakes in fear as the bullies approach. Tracy yells, “Ahhh! Get away from me!” A server at the Chinese restaurant that looks like Justin the robot is cooking chicken and chow mein and he hears the cry for help. Justin leaves the kitchen and he confronts the bullies. He said, “Have you ever heard it's wrong to pick on other people?” Alga turns around and she sees Justin and she said, “What's it to ya you red costumed freak?” Justin said, “I have something that you don't have. I have a creative mind that allows me to come up with things to keep me entertained. You clearly don't have that and now you are beating up someone that probably did nothing to you at all. You can leave now and all will be forgotten. If you stay, you may learn something.” Alga said, “I choose to learn something.” Justin said, “Then it's settled.” Alga's right-hand girl jumps at Justin and she punches Justin in the face and it does nothing to Justin. Justin said, “Is that the best you got? I didn't feel a thing.” The girl said, “I was just warming up.” She punches Justin in the face again and then Justin turns around and he allows the girl to punch him in the back and then in his chest. The girl's fist is weak and in pain and she falls to the ground.

Justin said, “You see, I defeated your comrade over here without having to throw a single punch. How's that for some mighty fine progress? Master says forgiveness is divine but you should never start a fight that you know you can't win. Like this one.” Alga said, “I will give you one you son of a...” Alga takes out her pocket boxing glove and she tries to use it to break Justin's face and she drags it around the surface of Justin's body and it does nothing to Justin and it just ruins her boxing glove. Alga said, “What kind of punker are you?” Justin said, “One that is going to put you in a lot of legal pain and suffering if you don't stop beating on this nice girl over here.” Alga said, “I've had enough. Let's finish him.” Alga and her remaining friends team up and they jump on Justin and Justin lifts all them up with his right hand and he throws them away and they land on the opposite side of the city. Justin brushes off his hands and he offers a hand to Tracy.

Tracy gets up and she walks down the street with Justin. Justin said, “So, what's your name?” Tracy said, “Tracy.” Justin said, “So Tracy, what do you like to do for fun?” Tracy said, “I like to draw and skateboard and come up with stories about things.” Justin said, “That is great. I need someone like you.” Justin opens up his back-storage compartment and he takes out two cans of cream soda. Justin said, “Cream soda?” Tracy takes one and she sips it. Tracy said, “This tastes like a vintage 2095 cream soda. I didn't know they still made these.” Justin said, “They don't. I won a lifetime supply of it back in 2096 and I still have barely scratched the surface.” Tracy said, “Who are you and what are you exactly?” Justin said, “I am Justin, the robot boy with the attitude to take on an army of evil doers. I was once a great super hero robot. I am not anymore though.” Tracy said, “Why not? Justin said, “Come to my house and I will explain.”

Chapter 2

Tracy and Justin enter Justin's house and Tracy sees posters on the wall of Justin doing heroic battle. Tracy takes a close look at the posters and she said, “This looks familiar. Is it... wait a minute, you're the Justin robot, aren't you? Aren't you the one that defeated Dr. Membres and all those other villains years ago?” Justin said, “Yes, I am. That was a long time ago and things have changed.” Tracy said, “Tell me this story. My folks talk about you all the time and I really would like to know why you disappeared from the public eye. You were so great how could you just leave it all?” Justin said, “It is a long story so sit back on my couch and take another cream soda.”

Justin said, “It was in December of 2099. It was more than a year after I thought I had stopped Dr. Membres.” Justin is on the street while the news reporters take photos of him. A news reporter said, “Hello, I am Carly Simon of DDD news. I am here on the scene as Justin is going to eat at his honors dinner at the city banquet hall of Green City. Tell me, Justin, what do you think of this?” Carly brings the microphone to the front door and she stops Justin. Justin said, “I am glad that I can serve this city. Action and justice truly are all the entertainment and reward I will ever need. I only came here because my manager insisted.” A small white robot next to Justin said, “You said you did want to eat here and possibly pick up girls.” Justin said, “Well, Syrus meant to say that I came here for the purpose of morale, I guess, and it was not just out of my own greed.” Carly said, “Are you saying that you're greedy?” Justin said, “No, I donated a lot of prize money to the charities and the orphanages of the city and from all over the world. I even shut down all the factories in Blood Town that polluted the air and... I really was not prepared for all these questions.” Justin pushes forwards and enters the banquet hall.

Justin has a seat and his robot sidekick Syrus sits next to him. Syrus said, “I never really thought you liked this kind of dinning.” Justin said, “I'm sure they have something that's good. Justin reaches into his back and pulls out a cream soda can and pours it into a fancy glass and he drinks it. Syrus gives him a dirty look and Justin looks around the venue. Justin sees there's a catwalk and he sees Charlotte an evil female robot standing on the catwalk. Justin taps Syrus' shoulder. Justin said, “Hey, Syrus, is that Charlotte up there?” Syrus takes a look and he said, “I think that is her. She was never captured I don't think.” Justin thinks and he said, “I don't think she was either. She is planning something I know it and I can't ignore this. I must see to this. Come with me, Syrus.”

Justin and Syrus walk to the catwalk and he sees Charlotte on there. Charlotte spots them and she leaves and runs into a room. Justin and Syrus enter the room and they stop her. Justin said, “What do you plan to pull?” Charlotte said, “I was just going here to see if you were here so I can tell you that you defeated me.” Justin said, “What do you mean?” Charlotte said, “We've been fighting for over a year now and I realize the bad guys never win which is what Dr. Membres was. I'm joining you. I know it is what's right.” Justin said, “Wait just a minute. You have a toxic gas can on you.” Justin grabs it and Charlotte resists. They fight over it and Justin said, “Help me, Syrus!” Syrus tries to find a good spot to strike and he places his mouth over the can and he tightens his mouth. Charlotte lets go of the can and she takes out a camera and she shoots a picture of Justin holding the gas can and Syrus' mouth is on it. Justin let goes of the can and it falls down Syrus' mouth and he swallows it. He begins to run around the room like crazy. He runs out of control and he runs down the catwalk and he screams, “Justin's a madman! Run for your lives.” Syrus loses control and he falls off the catwalk and he falls to the floor and his body smashes into a million pieces. Justin

looks down and he has a horrified look on his face. Charlotte laughs and Justin jumps on her and he punches her in the face and he holds her up and he said, “What's your plan? Talk! I'm not letting you go this easy. You killed Syrus you freak!” Carly is on the floor and the camera rolls. She said, “This is Carly again of DDD news. Justin has gone berserk and he is attacking a robot known as Charlotte. She just donated a lot of money to the local charity and she is being attacked by our hero Justin. This is coming in, we have a photo of Justin placing a toxic can down the throat of Syrus.” They show the photo Charlotte took earlier. Carly said, “It looks like Justin has gone homicidal and he is killing every robot he sees. We need to evacuate this place at once.” Everyone leaves the banquet hall.

Dr. Membres enters the banquet hall and he said, “Never fear, Dr. Membres is here.” Dr. Membres spots Justin fighting Charlotte and he goes there. Dr. Membres said, “Now Justin, it is important to play nice with your peers.” Justin said, “She is not my peer. She is my rival. I have competed with her for years now and she crossed the line. We never destroyed anyone before now.” Dr. Membres said, “Who will believe you?” Justin said, “What do you mean?” Dr. Membres takes out a taser and he fires it and it connects to Justin and it tasers him and he falls to the floor and rolls over. Dr. Membres gives Charlotte a hand up and he picks up Justin. He walks to the front of the hall and everyone sees that Dr. Membres has helped Charlotte up and he stands victorious over Justin. Carly holds the microphone up to Dr. Membres and she said, “How, you were a villain?” Dr. Membres said, “That's how it used to be. Things have changed. I am now the hero and this Justin here is now the villain. He belongs in prison for this.” Police try to capture Justin but Justin regains control of himself and he jumps out of Dr. Membres' grip and he escapes into the city. He runs through the city and he runs into the woods.

Justin said, “Since then, I have lived my life as an outcast. I went to a different city where no one would know me and I disguised myself as a cook robot. That's how I got that job working at the Chinese food place.” Tracy said, “This is awful. Our worlds are full of injustice. What should I do?” Justin said, “What can you do? Dr. Membres has been searching for me for years and he has become smarter and stronger.” Tracy said, “Could you at least help me with my problem? Maybe that could help you solve your problem?” Justin said, “My advice is to run to another city and stay there. Get a petty job and live low.” Tracy said, “Yeah like my mother would let me do that. I just moved here from another city. You could come to my place if you want. My family always invites guests over. Maybe we can come up with something together.” Justin said, “Alright, I guess I could do something different for once.”

Chapter 3

Justin and Tracy sit in the dinning room of Tracy's house while her mother makes some food. She serves them and she said, “Who's your new friend?” Tracy said, “This is...” Tracy looks at Justin and he shakes his head no. Tracy said, “This is Bob. He goes to my school.” Tracy's mother said, “Hello, Bob.” Justin said, “Hi.” Tracy's mother said, “I have some juice and club soda in the cupboard.” Justin said, “No thanks.” Justin reaches into one of his arms and he pulls out a bottle of cream soda and he chugs it down. Tracy's mother said, “The

principal called me today. She said you were being bad again. She said we should do something about that idiot problem of yours." Tracy gets up and she points at her mother and she said, "I am not an idiot or anything like that!" Tracy's mother said, "I think you should be grounded for the next few days and I should take you in for special therapy and counseling." Tracy said, "I know how to live. It's not my fault that I get bullied at school." Justin said, "I saw what happened. I'm her friend. She didn't really attack that girl, she was just defending herself from the impending doom. Self-defense. That's something I've been teaching her. I'm a certified martial arts teacher, see..." Justin takes out a martial arts certificate. Tracy's mother said, "I see. It still may not be a good idea that you hang out with my daughter."

Alga walks to her home while her mother (the evil principal) sits in her office. Alga walks to the office and she said, "Mother, I have to ask you something?" The principal said, "Go right ahead, dear. Tell me your heart's content." Alga said, "Tracy was going to beat me up again when I was going to get Chinese food and a super robot that works at the Chinese restaurant joined her and beat me up." Her mother said, "What did the robot look like?" Alga said, "He looked like a boy with black hairs and a red suit with a utility belt. He was quite remarkable and versatile. Do you know him?" Her mother said, "No, I don't think so." Alga goes to her room and the principal looks through a bunch of papers and she comes across a news article about, Justin. She looks carefully at it and she realizes that Justin was the robot that beat up her daughter. She goes to the phone book and she finds the number for the Chinese place. She calls them and she said, "Yes, I want to know about an employee of yours."

Justin walks home and he sees his house is trashed. He enters the front door and he sees someone broke in and smashed all his stuff. Justin's eyes go big and he said, "Who could have done this?" Justin sees his answering machine is still intact and it still works and he has a message. He presses the button on it and it said, "Hello, this is Mr. Wong from the Chinese place. I heard you beat up and scared some of my customers away. You're fired. I don't want to see your face again." The message ends. Justin shakes his head no.

Tracy lies in bed in fear of what will happen the next day. She hears a knock at her window. She opens it and Justin is there. She said, "Justin." She hugs Justin and she said, "Why are you here?" Justin said, "My house got trashed and I got fired from my job. It is obvious they know I'm here. I need to stay somewhere else for the next few days before I go to another city. The only problem is that there aren't that many more cities left for me to go to. Dr. Membres has conquered most of them now. It looks like I'm going to meet my fate." Tracy said, "What if my mom finds you or..." Justin said, "I will hide in that clump of papers in your closet. I will stay there and I won't make a sound. I could just pose as one of your toys." Tracy said, "Fine but don't be surprised if my mother finds you there."

Chapter 4

Tracy is in class the next day and the school is called to an assembly. People chat among themselves and someone asked, “What is the assembly about?” The principal walks at the front stage and she said, “There has been some threats given to some of our students by robots. I have invited a very special guest for us. Please welcome, Dr. David Membres.” The school claps except for Tracy and Dr. Membres stands at the front of the stage. Dr. Membres said, “I am Dr. Membres. I am one of the greatest genius scientists of this era. I have won many awards for my scientific achievements that include particle diffusion and robotics and that's the one I'm most proud of. I understand that a robot I helped construct fifteen years ago, Justin has been spotted in the city. I know all there is to know about him. He is dangerous. He tried to destroy an innocent robot eleven years ago and he destroyed one of his friends that never did him any wrong. If you see Justin, call me and report his position. My number is right there.” His phone number appears on the screen behind him that is also showing Justin. Dr. Membres said, “Justin used to be well liked. Your parents probably have fond memories of him saving our world from evil villains and evil robots but Justin is not like that anymore. He has changed. He now wants good people dead so he can rule over us. Don't let him have this. Don't let him become the next ruler of the world. Save your world before it is too late.” Tracy looks all freaked out.

The school day is ending and Tracy gets ready to leave and Dr. Membres stops her. Dr. Membres said, “Tracy. I heard Justin helped you beat up some kids yesterday.” Tracy looks at Dr. Membres and she said, “Get lost!” Dr. Membres said, “That's not a nice way to talk to someone. Your principal hired me to patrol the schools and to escort you to school and home from school.” Tracy tries to run away from him but he quickly catches up to her.” Tracy yells, “Leave me alone!” Dr. Membres continues to stalk Tracy and Tracy punches him in the gut and it hurts her fist. Tracy said, “Why are you so fast and why are you so strong?” Dr. Membres said, “Justin mangled me once many years ago. My life was saved when they built a robotic structure into my body. My body is mostly robotic. Tracy takes out her skateboard and she flies on it and he goes fast and everything is a blur. Except for Dr. Membres that is traveling just as fast as Tracy is.

Tracy looks at Dr. Membres and she said, “Get away from me!” Dr. Membres said, “You know I cannot allow that.” Tracy tries to outrun him but she can't. Dr. Membres keeps following her and Justin's voice said, “Leave her alone.” Dr. Membres looks down and he sees Justin flying up to Dr. Membres and Tracy. Justin flies close to Dr. Membres and Justin said, “It is I you want and not her. We are two entirely different people. I'm the one that put a dent in your life. Pick on me, not her.” Dr. Membres said, “For one, you did more than just put a dent in my life. You almost destroyed me once and you left me for dead a few other times and also, Tracy works for you. I know that. Tracy also is bad at school. She requires my supervision.” Justin said, “I know this is just some plan of yours and it is not going to work.” Justin grabs onto the flying board Dr. Membres is on and Justin tilts it so Dr. Membres falls off the board. Dr. Membres falls and he presses a button on his watch and a battle robot appears and Dr. Membres jumps into the cockpit of the robot. Justin said, “A robot battle? How original.” Dr. Membres whistles and giant green, red, and blue robots appear. Justin sees the robots as they appear and Justin said, “Red, green, and blue? It is not even Christmas yet and it is not even July yet.” Dr. Membres and the robots go to fight Justin.

Justin grabs onto the arm of the blue robot and he throws it into the green robot and they fall into the city and they crush and destroy a few buildings. The robots get back up and

they fly back to where Justin is. Justin kicks the red robot in the face and Justin uses the back of his right fist to punch the blue robot. Justin grabs the robots by their legs and he spins them around and he uses the blue and green robot to beat up the red robot. Justin mashes the two robots in his hands together and he finds a control chip on the inside of the blue robot. He places his hand there and he makes the blue robot rip the inside control chip out of the red robot and the red robot dies and it falls into the city and it crushes and destroys a whole city block. Tracy is still hovering around the fray watching what is happening. Justin jumps inside the blue robot and he cuts up all its insides and the blue robot dies and falls into the city and destroys another city block. The green robot takes a swing at Justin. It grabs Justin and it squeezes Justin tightly. Justin said, “It feels like my eyes are going to pop out like a Pecks dispenser.” Justin reaches into his belt and he takes out a pink grenade. He pulls the pin on it and he throws it into the air. It explodes and a pink liquid rains over the fight and over the city. Justin opens his mouth and he catches the drops of the pink liquid. Justin said, “There's nothing like having a cream soda in a fight.” Justin's muscles get big and strong and he explodes into fire and he flies around the green robot leaving a trail of fire around the robot. Justin flies to the robot's head and he said, “Stupid robot! Look what I got.” Justin holds a box up to the robot and he cranks the handle on it and it plays Jack in the Box music. The robot stares at the box and the music stops. The box opens up and a hand holding a piece of paper comes out. The robot grabs the paper and reads it. The paper said, “Notice of divorce. Your wife is getting a divorce. She has decided that you are ugly and disgusting and you have cooties. She is also taking everything you own.” The green robot reads this and he cries. He said, “I don't like this cruel world.” The robot aims himself for the ocean and he crashes into it and a large wave of water drenches the streets of the already destroyed city.

Dr. Membres said, “You idiot! Not only did you destroy my robots, you made a mess of the city.” Justin looks down and he sees people are terrified of the destruction. Justin said, “If you never sent those robots after me, none of this would have happened. Tracy, let's get out of here.” Justin and Tracy leave the scene. Dr. Membres takes out a cell phone and he said, “Police and civil servers, I have a case to file.”

Chapter 5

Justin and Tracy walk to Tracy's house. Tracy said, “That was awesome. That was totally insane. How did you do all that?” Justin said, “I'm the legendary, Justin. I am what I say I am. I am loved by the civilians and hated by the villains.” Tracy said, “I see.” They arrive at Tracy's house and Tracy's mother is standing outside of the house with a mean look on her face. Her mother said, “Tracy, I heard about what happened at school today and what just happened with your supervisor and that robot you hang out with.” Tracy's mother sticks a sheet of paper to Tracy and Tracy takes it off to look at it. Her and Justin look at the paper. The paper reads, “Legally Grounded.” Tracy said, “Legally grounded? Is that a thing?” The mother said, “It is now and I told you I was going to ground you if you kept this up. I did it there. You are now legally grounded. You are not liable for anything that happens outside of the house.”

Dr. Membres walks over to the house and he joins the characters. Dr. Membres said, “Ah, good day mother of Tracy.” Tracy's mother said, “Dr. Membres. I heard a lot about you. How's your new project going?” Dr. Membres said, “It's going good. I have authority that was granted to me by the school board and by the state and city and I have the right to place Justin and Tracy under my captivity. They have caused more damage than anything they have ever caused in their lives. It is in the best interest of the people of the city and myself that Tracy and Justin are to come with me where I can rehabilitate them into a more positive lifestyle.” Tracy's mother said, “I already grounded her but I don't think that will do anything at all. I guess you win. You are a trusted robotics engineer and you have a high level of authority over the city. I guess I can trust you with my daughter. I don't care so much about her friend though.” Dr. Membres said, “Come. I will take you to a nicer place for now where you will learn life skills.”

Dr. Membres throws Justin and Tracy into a shielded truck and it drives through the streets of the destroyed city. TVs fly around the city and they show the footage of Justin causing all the wreckage in the city. People see that Justin is in the shielded truck and they run for the truck and they bash their hands on the truck. Dr. Membres said, “This truck is protecting you from the world out there. If I let you out now, you would get killed by all these people. You know I'm good since I am not letting that happen.”

Dr. Membres drives underground a round building and he takes Justin and Tracy out of the truck. He gives Justin to one guard and he gives Tracy to another. They are brought to different rooms. Justin is brought into a room with a table and two chairs and a figure is sitting in the chair on the other side. Justin takes his seat. The figure has a woman's voice and she said, “Well, Justin. I knew you would be here.” Justin said, “I don't know what you're planning but it is not going to work. I am still powerful. My image may have become weak but my character is still strong.” The chair turns around and the figure in the chair is Charlotte. Justin said, “Charlotte? This makes sense now. I know the truth in this. This is a plot by Dr. Membres so he can have revenge on me for foiling all his plots as well as nearly destroying him a few times. Charlotte, Dr. Membres is using you. He used you that time he framed me for the death of Syrus and for all those other times he made you fight me. You can't live like this. You need to think for yourself.” Charlotte said, “I have thought for myself. I have lived a crummy life up until I met Dr. Membres. Dr. Membres gave me a new life that I could not have imagined before. I found my purpose in life and it was to rid the world of you and to rule it for myself and my leader, Dr. Membres.” Justin said, “I know how this works. You are just a pawn on his chess board. He is using you. Once he no longer needs you, he is going to turn on you. All the villains do that.” Charlotte said, “Since when did you care about me so much?” Justin said, “I care about everyone. Even the people I fight and bring to justice. Even though I may hate people like Dr. Membres and you, I still care about your wellbeing. Everyone deserves a good life regardless of who you are. Dr. Membres didn't get it the best and look at how he turned out. It is not too late to change.” Charlotte said, “You are being to talkie. I will send you to the play room and I will keep you there until you can learn to better compose yourself.” Charlotte presses a button and Justin falls down a chute and he lands in a play room that is a ball pit. Justin looks around the place and he said, “I wonder how I'm going to get out of this one?”

Tracy is brought to a table in front of Dr. Membres. Dr. Membres looks over Tracy's psychological evaluations. Dr. Membres said, “You were a pretty nice girl. Then your parents

got divorced and then you moved to Orlando and that's when things changed for the worst. What happened?" Tracy said, "You know, I get bullied a lot and I can't stand bullying." Dr. Membres said, "I got bullied a lot when I was your age. I became an accomplished robotics engineer. We have a lot of the machines we have today because of my work." Tracy said, "I don't like engineering." Dr. Membres said, "C'mon, you like technology, don't you?" Tracy said, "There once was a time when things were not all computerized and everyone liked it. It was called the 1990's I think." Dr. Membres said, "Ah, the 1990's. Those were some priceless good times. Technology became the best it could be before me. My path was paved by the greatest mind of that time, Dr. Gruzzard. You know what Dr. Gruzzard did?" Tracy shakes her head no. Dr. Membres said, "Dr. Gruzzard was an inspiration to me. He was smart and he was technologically advanced way beyond his time. He tried to rule the world with that technology once and almost won. He would have won if it weren't for... Sorry, I removed that page from all the history books so no one will ever know about the people that defeated Dr. Gruzzard." Tracy said, "I am just confused about all of this. Is it good to be a bully?" Dr. Membres said, "Yes, if you are picking on the right people. You need to pick on the weak scrawny little kids." Tracy said, "I don't like the sound of this." Dr. Membres said, "I do. I know just what this is. You have a condition of some sort that can only be cured by one thing only. We need to bring public attention to this."

Chapter 6

Dr. Membres enters the lobby of the DDD news headquarters with a tight grip on Tracy. He walks past the front where there's a waterfall and a gold statue of George Ferrier. Tracy looks at the gold plaque underneath the gold statue and it said, "George Ferrier, Reporter, Story Teller, Has Survived More than Anyone Else. Reporter from 1985 until he went missing in 2012." Tracy is thrown to the front desk and Dr. Membres said, "I'm Dr. Membres the brilliant robotics engineer and I have a news story I want you to do on the tonight's news." The person at the desk said, "We already have our schedule for tonight and..." Dr. Membres said, "I will pay whatever it takes. I own this station remember?" Dr. Membres shows his ID badge."

Justin is in a ball pit and he swims through the balls in the pit and he comes to the surface of the ocean of balls. Justin looks around the walls. He sees they are all white and perfectly smooth. Justin clings onto the edges of the walls and he rubs his hands over them. He feels a wall that feels hollow. Justin punches the wall and it reveals a pathway and he runs down the pathway. Justin runs down a hall and he comes to an intersection and he stops as he sees people are walking by. Justin hides behind a plant. Justin peeks up and he sees the coast is clear and he runs down a random hallway. Justin looks at his left wrist and he sees his computer screen on it. Justin said, "I just need to find Tracy and get us out of here. My GPS system does not seem to be working. I bet Dr. Membres did something to this place so no one can find it and so I cannot find my way out." Justin sees a cleaning robot enter a closet wearing a white coat that is dirty with cleaning supplies. Justin stops the robot and he said, "Hello, cleaning robot, I am your new boss." The cleaning robot said, "But my boss is at the corporate headquarters." Justin said, "I am your new boss now." Justin holds a fake badge up to the robot and it has a poorly drawn pencil drawing of Justin's face and it

reads, “Boss of Cleaning.” Justin said, “By order of myself, I command you to give me your coat and follow me to the exit of the building.” The cleaning robot takes off the white coat and he hands it to Justin and he said, “Yes, sir. Anything for you.”

Justin walks down the hallways and everyone sees him and they just think he is a cleaning robot so they do nothing. Justin arrives in the lobby where there is a TV showing DDD news. Justin looks at the TV and the news reporter comes on and she said, “Hello, This is Carly Simon of DDD news. We have a special report from our owner, Dr. Membres.” Dr. Membres appears on the screen with Tracy and she looks all fearful and she is shaking in fear. Justin said, “Tracy?” Dr. Membres said, “There's a group of people that are different from everyone else and they like to cause trouble for everyone else they see. They bully people for no reason at all. This is Tracy. She is a bully. She has done some pretty bad things. I think this is because of a condition she has that was caused by a certain friend of hers. Tell me Tracy, who is this friend and what has he done to you?” Tracy said, “I don't know what you are talking about.” Dr. Membres said, “You know, your robot friend.” Tracy said, “Justin is a very good friend. He never did anything bad to me. You just hate him because of what he's done to you before and you're using me as a punching bag against him. You just want to ruin my life so I will do what you want and you want Justin in a million pieces.” Dr. Membres said, “No, I don't want Justin in a million pieces. I just want you to know the difference between make believe and what is reality.” Tracy lightly punches Dr. Membres in the gut. Tracy looks into the camera and she said, “Dr. Membres is not telling the truth. Justin is a good man! Justin save me! Everyone, Dr. Membres is a madman!” The screen goes to the test colors.

Justin runs onto the street and he checks his GPS. Justin said, “I may be able to find the DDD news headquarters from here. I bet that's where Dr. Membres has Tracy.” Justin is given a path and he runs down the ruined streets from earlier. Justin darts left and then he darts right and he runs into a dead end. Justin hears a voice that said, “Well, look what we have.” Justin turns around and he sees the principal and she is with Alga and her friends. Alga said, “Dr. Membres has paid us a fortune to continue our hate on Tracy and the destruction of you.” Justin said, “I remember you. I kicked your butts last time.” The principal said, “We learned from our mistakes last time.” Alga jumps and she gets Justin stuck in a headlock. Justin throws her off and she smashes into a wall. Another bully runs for Justin and Justin just kicks her off. The principal grabs onto Justin's right fist and she twists it and she jerks it upwards. Justin punches the principal with his left hand and it doesn't do much. The principal let's go of Justin's hand and Justin falls to the ground in pain.

The principal said, “You are down! I thought it would take more than that to beat you.” Justin said, “It does.” Justin pulls out a box and a boxing glove on a coil comes out and it attacks the principal but the principal takes out a pair of scissors and she cuts the coil. Justin pulls out a set of magic 8 balls and he sees other bullies are coming for him. Justin juggles the magic 8 balls and he throws one of them at one of the bullies and it breaks and a message appears in the sky that reads, “You will fail your next test.” Justin throws another one at Alga and it said, “The dusk of your career is setting.” Justin is about to throw one at the principal but she takes out a pellet launcher and she fires a pellet and it breaks the magic 8 ball over Justin's head and the message said, “You will be cursed for all eternity.”

Justin looks at the message and he said, “That's doesn't look good.” The principal punches Justin in the gut and she punches him in the face and he flies to the other end of the

fray and he smashes into a wall. His face looks beat up and some of his skin is worn off showing the circuitry underneath his face. Alga takes out a titanium bat club and she smashes Justin's head into his body. Justin pulls his head out of his body and Alga swings it again and it hits his body leaving a large dent in his chest and chipped paint. Alga swings again and Justin grabs onto the club and he connects to the top and he jumps off it and he kicks Alga in the head and she falls to the ground. Another bully comes and Justin hits her off with a club. The principal comes to Justin and Justin swings the club at the principal and it hits her and does nothing. The principal rips the club out of Justin's hand and she bends it into a figure eight and she drops it in front of Justin. Justin tries to leave the fray but the principal grabs onto Justin's foot and she swings Justin around smashing him into the floor and into the walls. She knees him in the crotch and she breaks a hole in Justin and she sticks her arm in and she rips out his robotic circuitry. Justin is nearly dead and he falls on the ground.

Chapter 7

The principal and her bullies leave Justin for dead on the street. Justin lies there for hours and his left eye begins to slowly open. His left hand somewhat works and his other arm has been torn off. He looks at the street and he sees his parts are scattered everywhere. Justin sees his legs have been broken off and his broken off legs look smashed. Justin falls back in his spot and he said, “Wha... Wha... Wha... Whaa t to doddd.” Justin sees a strange familiar figure show up. He appears to be a man that wears a long white cloak. He picks up Justin and his parts and he places them into a container and leaves the scene.

Justin wakes up in a robotics lab and he sees machines are working everywhere. Justin looks in a mirror that is close by to where he's lying and he sees his face. It looks swollen and large and his head looks big and it has a white cloth wrapped around it. Justin said, “Where am I? Hey, I can speak again.” The strange and familiar man appears in the lab and he walks to Justin. He said, “I see you are finally up. You had quite a beating out there. Are you feeling better?” Justin said, “I will once I get my arm and legs back.” The man said, “I have that right here.” The man takes Justin's fixed legs and he reconnects them to Justin's body. The man said, “These legs are not cosmetically fixed but they will perform their function. Your right arm was too badly damaged to be fixed but I am working on a replacement right now. It will be ready in a few days.” Justin said, “I can't wait a few days. There's an innocent girl named Tracy that is in the clutches of Dr. Membres. I need to save her.” The man said, “You will. I have a temporary arm here for you. It is not as good as the one I am working on but it will work for now.” Justin said, “Who are you anyways?” The man said, “I am Dr. Livingston. I am your creator. I was the top of the top CEO of the regional Craft Research Team when you were made. I envisioned you. I gave the order to have you made.” Justin thinks back to then and he said, “I remember you now. I haven't seen you since...” Dr. Livingston said, “Since the time you defeated Dr. Membres all those years back and when I decided it was time for you to live on your own. I watched your progress over the years. I saw all those other times you defeated Dr. Membres and all those other villains and I was quite impressed. I wanted to meet you again. I am proud of my work. I created a citizen of the world.” Justin said, “Do you know anything on how to defeat Dr. Membres?” Dr.

Livingston said, “I do. I have something else important to tell you. Dr. Membres has used a robot known as Charlotte to fight you.” Justin said, “I know that. Tell me about it.” Dr. Livingston said, “There is something you need to know about, Charlotte. She is you sister.” Justin's eyes go big and he said, “How is she my sister?” Dr. Livingston said, “Charlotte was conceived about ten years before you were made. I created her with the team I had then. She was perfect. She was too perfect. She left the research center in the middle of the night and she filed a case against us that she was a real living person and should have all the rights of a real person. She won her case and she was no longer our property. She was then adopted by a family and raise by a family that misused her. She then went bad and she eventually met Dr. Membres and he treated her well and now, that is where we are now.” Justin sits back and he said, “There is a way to redeem Charlotte. She's powerful. I know she would make a great ally. There needs to be a way to get her to take our side. We would defeat Dr. Membres for sure.” Dr. Livingston said, “That is exactly my plan.”

Justin continues to lie down in his repair seat and he uses his temporary arm and he drinks a cream soda and he watches DDD news. Dr. Livingston goes to work on something and Justin said, “Why do we watch this DDD news crap? This is the news channel that ruined my reputation. This channel has a history of ruining people's reputations.” Dr. Livingston said, “There could be a way to change your reputation using DDD news for the better.” Justin looks at the screen and he sees Dr. Membres is on the screen again. Dr. Membres said, “Join me tonight at the city's convention center as we celebrate my achievements. I will be there along with some of my other creations and students.” Justin sees that Tracy is on the screen. Justin said, “This guy just said that he would be at the convention center tonight with Tracy.” Dr. Membres said, “Tickets are $300 per person and robots are admitted for free and DDD news will cover the event so if you can't make it there, you can watch the whole thing on DDD news.” Justin said, “I know how to save my reputation.” The screen goes to the gold statue of George Ferrier. Justin said, “Why do we honor such people like news men?”

Dr. Livingston shows Justin, the robot he was just working on. Dr. Livingston said, “This is Larry. He is the comedy robot I just made. He is sure to steal the attention of anyone at any event ever. Let's watch him.” Dr. Livingston turns on the round green robot and he is activated. His eyes light up and he said, “Howdy boys and girls, ladies and germs. It is I, Larry the comedian. What is your name?” Justin said, “Ahh, Justin.” Larry said, “Well hello Justin, this is Just in that your name is Justin.” Justin makes an angry look on his face and he kicks Larry and he goes flying to the other end of the lab and he smashes into a wall. Larry uses turbo boosters in his hands and feet and he flies back to where he was before and there is not a single scratch or sign of damage on him. Justin said, “You? How?” Dr. Livingston said, “I knew someone had to take a stand against Dr. Membres and I didn't think you would ever fight him again and be successful at it so I built a replacement for you, Larry. He is funny and he does not require as much cream soda as you do. We will go to that ball tonight and we will bring Larry with us. The ad on TV did say that robots are admitted for free. I have enough money to admit myself in. I will bet that Dr. Membres has some of his other henchmen there as well. I have prepared for that too.”

Chapter 8

Justin and Larry ride in the backseat of a car and Dr. Livingston is driving. Justin looks down and he and Larry are wearing tuxedos. Justin said, “My suit looks nice for a ball but my face looks ugly as a monkey’s butt.” Dr. Livingston said, “That is just what we need. We need the visitors there to feel remorse for you. You actually are damaged so the remorse will be genuinely real.” Justin looks down and he said, “I hope that works.” Dr. Livingston said, “You described to me during that fight that those school bullies did not take any damage from your attacks. Dr. Membres must have used an Alpha Shield system on them. It is the best kind of shield system anyone could get. Thankfully for my knowledge and intellect, I created an anti-shield that will help you fight them. It is being injected into your hands as we speak.” A hand comes out from the side of the car and it injects a serum into Justin's hands. The car stops and Dr. Livingston said, “We're here.”

Justin and Larry get out of the car and a red carpet is rolled from the door of the car to the door of the convention center. People crowd around and they snap pictures of Justin and Larry. Larry said, “I love the famous treatment. It really does feel good. I prefer this kind of flashing over the other kind of flashing if you know what I mean.” Justin said, “I don't think any of these people recognize me.” Larry said, “I think that's a good thing. No one wants to be you right now.” Justin said, “That is very reassuring.” Justin and Larry enter the convention center and they take seats around a table and there are 400 tables that form around a large stage. There is a giant screen TV on the stage and it is showing DDD news and it is showing where Justin and Larry were a few minutes ago. Dr. Membres walks on the red carpet and he is with Charlotte and they are followed by the principal and the bullies. Justin said, “I wonder where Tracy is.” Larry said, “Shhh, you're ruining the moment.” In the next few minutes, more and more people enter and they take their seats.

The entire room goes pitch black and the stage lights up. Dr. Membres is on the stage and he said, “Hello everyone. I am glad all of you can make it. I am of course your host and master of ceremonies, Dr. Membres. We have a lot of acts to put on and a lot of people and robots to acknowledge. I see a lot of them are with us right now. We will give it up for, the juggling Acrobots.” Everyone claps and juggling robots appear on the stage and circus music plays. Larry smiles and claps at what he sees and Justin just gives an annoyed look. Larry said, “You used to have a comical character.” Justin said, “I think that character got lost on that street where my appearance changed.” The act ends and Dr. Membres goes back on stage. Dr. Membres said, “I care about children. I want them to succeed. I can tell when someone is doing poorly on something or just doing poorly in general. This is a student I want us to take attention to, give up for, Tracy.” Tracy falls from the ceiling onto the stage. Larry claps hysterically and Justin has a laser focused look on Tracy.

Dr. Membres said, “Tracy is a special kid. She is a bully in school. She bullies kids and she believes she's friends with the robot known as, Justin. She really just suffers from...” Larry gets on stage and he said, “Let me take it from here Dr. Membres. What he is trying to say is, she is suffering from bullying and harassment from her principal and her peers and of course, Dr. Membres. There is no proof that Tracy has any of these problems of being a bully that Dr. Membres says she has. It is like that story of Clark. You know, Clark farted in church.” Everyone in the audience laughs. Larry said, “Dude, Clark, you farted in church man.” Dr. Membres leaves the stage with a mean look on his face. Dr. Membres goes backstage and he sees his backstage manager. Dr. Membres said, “What's going on out there?” The backstage manager said, “We are getting feedback and the audience says they

love it." Dr. Membres peeks outside and he sees everyone is laughing at Larry. Dr. Membres said, "I will give the audience something to actually laugh at."

Larry is walking back and forth and he is doing stand-up comedy. Larry said, "The dummy bot and the moron bot are sitting on the chair and the dummy bot falls of the chair and the moron bot does not fall of the chair. Why is this?" The audience said, "We want to know." Larry said, "Because he was a little more on!" The audience bursts out laughing. The mayor is there and he is laughing his face off and all the city people are falling on the floor laughing. Some people are falling off a balcony in laughter. Charlotte enters the stage and she said, "I have a real funny thing. What do you call a robot that gets in the way of my laser-beam?" Larry said, "Fried chicken?" Everyone in the audience laughs. Charlotte said, "A dead robot." She fires out a laser-beam and Larry dodges it and he grabs Tracy and he tries to bring her to safety. Larry tries to run off the stage with Tracy and he is stopped by bullies and Dr. Membres' evil henchbots. Justin enters the stage and he said, "Let him go with Tracy!" Charlotte looks at Justin. She said, "What happened to you? How could you let yourself go?" The audience looks at Justin and they boo at him and one of the members in the audience said, "You look disgusting" and he throws a glass of champagne at Justin. Justin said, "You must listen to me. Dr. Membres is a mad man. He just sent Charlotte, my sister over here to destroy Larry and Tracy." People in the audience are scratching their heads. Charlotte said, "Sister?"

Justin said, "That's right. You are my sister. You were built ten years before me and you learned more than any other robot has ever learned. You have all the right to be free and independent while I dedicated my life to saving the world from evil. Dr. Membres found a way to overload your program and manipulate it. He co-created you. He is using you for his own wrong doing. He has done that since the moment you first met him." Charlotte stands still for a moment and she said, "That may be true. It is time you get completely destroyed now." She fires out her laser-beam and Justin jumps and the beam chases Justin and the beam destroys everything in its path. Justin over runs the beam and he runs close to Charlotte and he punches her at one side and he jumps and he kicks her in the head and he kicks her in the face. Charlotte punches Justin in the chest and she trips his legs and he falls to the floor and Charlotte kicks Justin and she sends him sliding off the stage. Larry stops Justin from falling off the stage and he sets Justin back up. Justin said, "Thanks, Larry." Justin runs for Charlotte and Charlotte is going to fire her laser-beam at Justin. Justin rolls on the floor and dodges the attack and he pulls out a mirror and he deflects the attack and Charlotte moves out of the way and the laser-beam hits a wall and the wall vaporizes. Tracy is standing in the middle of the action and she is not sure what to do. Tracy sees Charlotte and she gives a daring look and she runs for Charlotte and she grabs onto the side of Charlotte and she punches her and it does nothing. Charlotte looks at Tracy and she said, "Get off me you stupid brat!" Justin kicks Charlotte in the face again and he takes out a metal hammer and he smashes her in the face. Charlotte falls to the floor and a switch inside her head with Dr. Membres' logo on it breaks and the shards of the switch fly out of her head. She lies there still. Justin and Larry take a look at her and Charlotte said, "What happened? The last thing I remembered was me being at my house all alone in the middle of nowhere." Justin said, "An evil man named, Dr. Membres took over your mind and he manipulated you to a point where you weren't yourself. He is here now. I am your brother. I am also a battle robot." Charlotte looks backstage and she sees Dr. Membres and she sees he's plotting something. Charlotte said, "Dr. Membres is dead!"

Chapter 9

Dr. Membres walks out on the stage and he is with the principal and the bullies. Dr. Membres said, “I've seen what you've done. You've only destroyed one of my evil robots, but you have not destroyed them all.” Dr. Membres sends out the principal and the bullies to fight Justin, Charlotte, and Larry. They all duke it out on the stage. Justin kicks one bully off the stage and he punches another one in the face. Larry stretches out his large fat arms and he knocks down a whole legion of bullies and robots and they fall off the stage. Larry said, “STRIKE!” Charlotte knocks down a bully and a group of them jump on her and she throws all of them off. The principal and Alga walk on the stage. They see Tracy and Tracy screams. The hero robots stand in front of Tracy and Justin said, “You are not getting her. You may have beat me once but you will never destroy me.” Justin jumps and he uppercuts the principal. She spins across the stage and Larry gets hold of her and he spins her even more and Charlotte takes out a fusion cutter. Justin said, “We can't kill people. That's morally wrong.” Charlotte said, “They are not people.” Charlotte runs and she slices the principal while she is spinning and she explodes into metal and silicon debris. Justin said, “The principal was a robot?” Charlotte said, “Did you think he would recruit humans to fight us?” Justin said, “How would you remember that if...” Charlotte said, “I must have been equipped with the special vision to tell who is a robot and who is human. All of Dr. Membres' henchmen are robots.” Justin said, “This makes it even better.”

Justin takes out his metal hammer and he swings it and smashes Alga. Alga stays in place and she grabs the hammer and she destroys it. Justin said, “She is still strong.” Charlotte said, “I can see her weakness. I know how to beat her.” Justin said, “How?” Charlotte said, “We need to overload her memory and circuits.” Larry said, “I know how to do that.” Larry walks up to Alga and Larry said, “You must be Alga, are you just an Al or are you also a Ga?” While that happens, Justin said, “The particle theory of matter describes the chemical relationships between partners in a parentecireal murder case of this...” Charlotte said, “BEER! WINE! LIQUOR! IT IS GOOD FOR ABOSOULUTELY NOTHING!” Alga's circuits are having trouble comprehending all the data that is going on around her. She begins to run and she darts off the stage and Larry grabs onto her and he holds her while her legs are running fast. Larry said, “You must go back stage.” He directs Alga to the back stage and she runs back there and she crashes into sound equipment and she runs into an electricity box and she gets electrocuted and all that is left of her is a black robot outline.

Justin, Charlotte, and Larry hi five each other as they jump in the air. Tracy joins them and she said, “I never seen such a great heroic team in my life.” Dr. Membres walks on stage. He said, “This cannot be happening. I sent all my top of the top robots against you and you still defeated them. You have not beat me yet. I still own this station.” The robots look around and they see DDD news cameras flying around the stage. Carly Simon shows up and she is standing on a flying platform. She said, “Carly Simon here of DDD news. We have just seen an epic battle between the robots on the platform and Dr. Membres. We have just received word that Dr. Membres no longer owns DDD news.” Dr. Membres hears that and he said, “What do you mean?” Carly said, “It seems that DDD news is only to be owned by people in the Ferrier clan. Dr. Membres made a member of that clan drunk and he signed over the ownership of the station. Dr. Membres did something illegal and he will be arrested

for that and ownership has returned to its rightful owner." Dr. Membres grabs at his scalp and he said, "If I still had hair I would be pulling it out right now." Carly said, "The mayor is with me too." The mayor gets in the center of the picture and he said, "Dr. Membres is no longer welcome in my city. He even tricked me into hiring robots to work for the schools in my school district. He probably did this as some sort of plot to get rid of Justin. I won't allow that. Justin saved my life once. I would have died in a car accident if it weren't for him."

Dr. Membres' face goes red and he presses a button on his collar and a robot suit generates from underneath his head. Dr. Membres becomes a giant robot with a house as a body center. Justin said, "It looks like he just became someone's house. He probably stole that from some poor old soul somewhere." A man in rags points to the house and he said, "That's my house! That's the guy that stole my house!" Carly said, "It looks like another crime Dr. Membres had committed." Dr. Membres places the house on the stage and he uses his arm to force Justin, Charlotte, Larry, and Tracy into the house. They are trapped in the house. They look inside and they see furniture and they see a TV and a fridge. Justin opens the fridge and it is filled with large cases of cream soda. Justin takes one out of the fridge and Charlotte said, "I wouldn't drink that if I were you. This may be another trick." Justin drops the soda and it spills on the floor and it burns a hole in the floor." Tracy said, "You did it. The cream soda, it burns through things." Justin takes out a water cannon and he fills it up with the cream soda and he burns through the walls. The TV turns on and Dr. Membres' face is on the screen and he said, "Eek! Why didn't you fall for my trap?" Tracy said, "Because were not stupid." Dr. Membres said, "That's too bad because you still failed. The chamber that I rest in is guarded by an anti-robot field. It will deactivate any robot that enters the field." Tracy said, "We can just burn down the generators with the cream soda." Dr. Membres said, "Drat! Why didn't I think of that?"

Justin loads himself up with the cream soda and the team walks up the stairs and they are confronted by evil robots. Justin blasts one of the robots with the cream soda and it melts into a steaming mess. Justin looks at the other evil robots and they run away in fear. Justin and the team look up at the chamber that Dr. Membres is in. Justin melts the area around it with the cream soda and the team heads up.

They are now in a small tight room and Dr. Membres is in a tube in the middle of the room. Justin said, "You better come out and surrender now." Dr. Membres said, "Remember Justin, I co-created you and I know about your insides and they should be easier to destroy considering how weak you are." Justin said, "I may seem weak to you but to me and my friends, I am stronger than you." Dr. Membres opens a door on the tube and he steps out. He said, "You are strong and your friends make you stronger." Dr. Membres takes out two cannons and he fires them and a circular laser beam moves around the room. Charlotte and Larry run and they try to dodge the laser and they both crash into each other and they fall to the floor and they are deactivated. Justin looks at them and he said, "It is not over yet." Dr. Membres fires one of the beams and Justin does a back flip and he dodges the beam. Dr. Membres fires it again and Justin runs up the wall and he flips off it and he dodges the beam again. Justin reaches for something in his pocket and he pulls something out but a millisecond later, Dr. Membres' beam hits the object in Justin's hand and Justin flips backwards and he smashes against the wall and his eyes move upwards and they stay that way.

Tracy said, "What did you do?" Dr. Membres said, "I deactivated them. They cannot

be turned on unless you open them up and reset their switch." Tracy said, "You villainous fool!" Tracy jumps on Dr. Membres and she punches him in the head multiple times and Dr. Membres throws her off. Dr. Membres said, "Enough you fool. You are not going to stop me. I have an ultimate ray in this machine and it will spell certain doom for Justin and all his robot friends. I just need the key." Tracy holds a key up to Dr. Membres and she said, "You mean this key?" Dr. Membres said, "That's it. Where did you find it?" Tracy said, "I grabbed it out of your pocket as I went to punch that deflating balloon you call a head." Dr. Membres said, "You take that back!" Tracy kicks Dr. Membres in the face and she kicks him in the crotch and she whams him in the gut and she trips him and he falls to the floor and he smashes his head on the side of the tube. Dr. Membres said, "How did you get so good?" Tracy said, "I learned from the master." She looks at Justin lying on the side of the room. Justin gets up and he looks at Dr. Membres. Justin said, "Robot parts failing you huh?" Dr. Membres said, "I invested a lot of money to make me more human to undo the damage you have caused me." Justin said, "Guess what? There's going to be a lot more damage to come." Justin punches Dr. Membres in the head and he jabs his hand into Dr. Membres' head and he rips out a motherboard and Justin smashes it. Dr. Membres lies there motionless with smoke coming off him.

Tracy hugs Justin and she said, "You did it! You truly are great. How are you not deactivated?" Justin shows Tracy a mirror. Justin said, "I used mu mirror." Tracy said, "I see. What do we do now?" Justin said, "We crash this thing into the ocean and let it erode there for a thousand years." Justin gets to the controls and he controls the robot and he drives it into the ocean and he crashes it there and it fills with water. Justin grabs the body of Dr. Membres and he takes his friends and he jumps out of the robot and he lands on the shore. Police show up and they take Dr. Membres' body into custody and the mayor meets with Justin. The mayor said, "Justin, you've done it again. You've crushed Dr. Membres yet again and this time, it looks like you turned his greatest prized robot into a hero that helped you fight back there. You deserve a medal of honor." The mayor places a medal around Justin and he gives Tracy a medal and he places one on Charlotte and Larry.

Chapter 10

Justin has a shiny ruby red suit again and his face looks as shiny as ever. He is on a stage with Larry and they speak into a microphone. Justin said, "And the Turndexter said..." Larry makes blasting sounds with his mouth. Justin said, "That's totally what they think of you." Everyone in the audience laughs. Justin and Larry hi five each other. The show ends and Dr. Livingston and Tracy show up on stage. Dr. Livingston said, "The two of you kill us every time. I am starting up the regional Craft Research Team again and we will be hiring some more people." Tracy holds a gold diploma on wood to Justin. Tracy said, "I finished school and I now have a high degree of education on arts." Dr. Livingston said, "Tracy will be the first art student to have the Craft Research Team scholarship and she will probably become a robot concept artist. Justin said, "That's great." The robots walks outside and the sky is nice and blue and the city looks completely repaired.

In a dark prison, the robot body of Dr. Membres is floating in a tube filled with a blue liquid. A mad scientist in in there. He said, "My plan has failed. The Dr. Membres program

really doesn't work. I need to come up with a new plan. I need computer viruses and I need other corruption tools. I have just what I need. Ha ha ha..." There is a table filled with robotic parts and weapons.
